DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 34, 36, 37 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Stephens-5,690,663.

As to claims 1, 34, 36, 37 and 43, Stephens (Figs. 1 and 9-11) discloses a cannula and obturator combination and inherently a method for using the combination as recited in the claims. The combination of cannula and obturator includes cannula 12, shaft 202 (Fig. 11), apex knife 104 (Figs. 9, 11), apex knife shield 102 (Fig. 9A-B and 11), bias spring 200 (Fig. 11); shield base 202 (Fig. 11) substantially as recited in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3773

Claims 2-33, 35, 38-42 and 44-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stephens-5,690,663.

Stephens-'663 discloses substantially the claimed invention except for the features recited in claims 2-33, 35, 38-42 and 44-45. However, the features in the claims are well known features of a cannula-obturator combination. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Stephens-'663 device to have the well known features in the Stephens-'663 as recited in the claims.
